

Migrate from Oracle to PostgreSQL up to 50 percent faster and cheaper

ABOUT NEWT GLOBAL CONSULTING:

Newt Global is a leader in cloud transformation and cloud migration process automation for databases (DB) and applications. Our DMAP and CAMPP platforms are helping Fortune 500 enterprises realize millions of dollars in cost savings and productivity gains.

What our customers are saying

"I was impressed by Newt's DMAP platform. At first, we estimated a two-month timeframe to complete the project, but managed to migrate from Oracle to Azure Database for PostgreSQL in less than a month, thanks to DMAP."

— Director, IT, Leading unified communication enterprise

WHAT WE OFFER

Newt Global's proprietary Database Migration Acceleration Platform (DMAP) helps accelerate migration from Oracle to PostgreSQL via automated schema conversion. DMAP's comprehensive features include discovery, assessment, conversion, schema validation, test data migration, and functional and performance validation using an in-built CICD framework for iterative conversion and testing. DMAP facilitates migration of Oracle databases to Microsoft Azure Database for PostgreSQL on the Azure cloud.

DMAP enables batch processes to run discovery and assessment, helping organizations understand the true effort required for schema conversion and providing them with recommendations for resolving schema conversion errors.

DMAP-led conversions have consistently delivered significant reductions—up to 50 percent when compared with other open-source tools—in the overall effort required during the migration process, favoring scaled migration and shortening project timeframes.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
