1. Introduction

This document provides an overview of enhancements rolled out with the new DMAP release version 8.5.0.5 In this document Image refers to docker or podman image that is used to launch docker or podman based containers for DMAP DB & App migration features.

2. Changes / Enhancements

Sr. #	Change Description
1	New feature added to support MSSQL to Postgres conversion
2	Enhanced the package global variable and collection type constructs
3	Enhanced the Angular framework to version 19 for better performance
4	Bug fixes on database and application migration

3. Installation Procedure

Updates will be automatically downloaded when you restart your DMAP docker or podman containers. Please wait for 10-15 minutes depending upon your internet speed to allow updates to be downloaded. While updates are being downloaded, DMAP login page will not open in chrome browser. You can refresh the login page after few minutes to confirm that your DMAP version has been updated successfully.

To install DMAP or view the Release Notes, please visit <https://newtglobal.com/dmapreleases/>

4. Minimum Image Requirements

This release requires below mentioned minimum versions of DMAP DB and App migration container images.

Minimum DB Migration Container Image version: 2025.09.0.1

Minimum App Migration Container Image version: 2025.09.0.1

If you are running DMAP containers with an older version of image, then upon restarting the containers you will be prompted to upgrade to latest version of images.

5. Support

For immediate assistance, please contact us at dmap@newtglobalcorp.com and one of our technical team members will work with you to resolve your issue.
